

Modern Foreign Language Teaching in Junior Colleges, Fall 1959, Fall 1960*

By J. WESLEY CHILDERS AND BARBARA BATES BELL

This report is the seventh in a series of eight on aspects of modern foreign language teaching in accredited institutions of higher learning in the United States. The six previous reports have presented data on entrance and degree requirements, certification requirements, language faculties, teacher-education curricula, modern foreign language enrollments in four-year colleges (fall 1958 and fall 1959), and special teaching practices in colleges and universities. The eighth report will present modern language enrollments for the fall of 1960 in four-year institutions. These eight studies have been conducted by the Modern Language Association under contract with the United States Office of Education.

The basic list of accredited junior colleges used for this survey was that of the United States Office of Education, enlarged by inclusions of some other regional and state accredited colleges listed in Gleazer's *American Junior Colleges*.¹ A summary of the total mailings and replies is given in Table A.

Principal abbreviations used in this report are:

A & M—Agricultural & Mechanical	INST—Institute
ACAD—Academy	JC—Junior College
AG—Agriculture or Agricultural	SC—State College
C—College	TECH—Technology, Technical, or Technological
CC—Community College	TSP—Township
CJC—Community Junior College	U—University

The Modern Language Association research staff extends sincere thanks to the registrars and deans of the 578 junior colleges who sent data for this study, and to Dr. Bronson Price of the United States Office of Education, who helped formulate the questionnaire used in this survey. The authors also acknowledge their debt to the following members of the MLA Research Center: (1) Donald D. Walsh, Director of the Foreign Language Program, for careful editing of the report;

* The research reported herein was performed pursuant to a contract with the United States Office of Education, Department of Health, Education, and Welfare.

¹ Edmund J. Gleazer, Jr., *American Junior Colleges*, 5th ed., Washington, American Council on Education, 1960.

(2) Harry Margulis, for help in final tabulation of data.

J. WESLEY CHILDERS
Director of Research

9 May 1961

HIGHLIGHTS

1. Almost 80 per cent of the accredited junior colleges in the United States offered modern foreign

and 51,570 in 1960, a 15.1 per cent increase. During the same interval, from the 474 institutions which reported modern foreign language data, the degree-credit student enrollment rose from 370,986 to 416,522, an increase of 45,536 or 12.3 per cent.

Enrollments in modern foreign languages constituted 12.1 per cent of the total degree-credit students in 1959 and 12.4 per cent in 1960. Spanish, French, and German were the principal languages taught, accounting for 95 per cent of the total enrollments in modern foreign languages.

The per cents for each of the five principal languages reported from the junior colleges are shown in Table B.

Analysis of Statistical Tables: Table 1 presents a summary by states of the total degree-credit students and modern foreign language stu-

languages in the fall of 1959 and the fall of 1960.

2. The per cent of increase for degree-credit student enrollments for the one-year interval was 12.3; the modern foreign language enrollment per cent of increase was 15.1.

3. Modern foreign language enrollments constituted 12.1 per cent of the total degree-credit students in 1959 and 12.4 per cent in 1960.

4. Spanish led in per cent of individual-language enrollment to the total modern foreign language enrollment with 39.1 per cent in the fall of 1959 and 38.7 per cent in the fall of 1960. The other languages with per cents for 1959 and 1960 were: French (35.6 and 36.7), German (20.4 and 19.6), and other languages (5.0 for each year).

5. California, with 63 junior colleges reporting modern foreign language enrollments had the highest number of colleges and the most students in each language reported in this study.

Summary of National Data: Modern foreign language enrollments in accredited junior colleges of the United States were 44,809 in the fall of 1959

and 51,570 in 1960, a 15.1 per cent increase. During the same interval, from the 474 institutions which reported modern foreign language data, the degree-credit student enrollment rose from 370,986 to 416,522, an increase of 45,536 or 12.3 per cent. Enrollments in modern foreign languages constituted 12.1 per cent of the total degree-credit students in 1959 and 12.4 per cent in 1960. Spanish, French, and German were the principal languages taught, accounting for 95 per cent of the total enrollments in modern foreign languages. The per cents for each of the five principal languages reported from the junior colleges are shown in Table B. *Analysis of Statistical Tables:* Table 1 presents a summary by states of the total degree-credit students and modern foreign language stu-

Table 2 gives the enrollments in French by states. It shows that French went from a total of 15,934 students in the fall of 1959 to 18,942 in the fall of 1960, an increase of 3,008 or 18.9 per cent. French also increased from 35.6 per cent of the total modern foreign language enrollments in 1959 to 36.7 per cent in 1960. Nine states (Alabama, Arkansas, Georgia, Indiana, Louisiana, Nebraska, New Hampshire, Oklahoma, and Oregon) showed slight decreases in French enrollments in 1960, but the total loss was only 157. California

TABLE A. SUMMARY OF MAILINGS AND REPLIES

Number of Institutions Surveyed	Number of Replies	Per Cent of 609	Number With MFLs	Per Cent of 578	Number Without MFLs	Per Cent of 578
609	578	94.9	474	82.0	104	18.0

had the highest enrollment in French in both years (4,775 or 30.0% of total French enrollment in 1959, and 5,588 or 29.5% in 1960).

Table 3 shows that enrollments in German went from 9,128 in 1959 to 10,083 in 1960, an increase of 955 or 10.5 per cent. Enrollments in sixteen states showed decreases, but the losses for these states totaled only 214. German enrollments in 1959 were 20.4 per cent of the total modern foreign language enrollments and 19.6 per cent in 1960. California's junior colleges enrolled 39.1 per cent of the total enrollments in German in 1959 and 40.1 per cent in 1960.

Table 4 lists the enrollments in Italian from seven states in 1959 and from five in 1960. The total enrollments were low: 391 in 1959 and 390 in 1960. Four states (Illinois, New Jersey, New York, and Washington) show per cents of decrease, but the actual enrollment loss was 57, or a total per cent decrease of .3. California enrolled 65.7 per cent of the Italian students in 1959 and 75.9 per cent in 1960.

Table 5 summarizes the enrollments in Russian from eighteen states in 1959 and in 1960. Five of the states on the 1960 list (total of 54 students) did not have enrollments in Russian in 1959; five on the 1959 list (total of 80 students) had no enrollments in 1960. Over the one-year interval (fall 1959-fall 1960), enrollments in Russian rose from 1,544 to 1,623, an increase of 79 or 5.1 per cent. During the same time, the per cent of Russian enrollments in the total modern foreign language enrollments fell from 3.4 to 3.1. Fourteen of the eighteen states which reported Russian in 1959

show decreases in 1960, with a total loss of 263; Massachusetts maintained the same enrollment, and three states (California, Maryland, and Texas) showed increases. California's per cent of the enrollment in Russian for 1959 was 50.5; for 1960 it was 64.6.

Table 6 shows that Spanish enrollments increased by 2,466 or 14.1 per cent, from a total of 17,503 in 1959 to 19,969 in 1960, although the per cent of Spanish in the total modern foreign language enrollments dropped slightly from 39.1 in 1959 to 38.7 in 1960. Of the forty-one states with Spanish enrollments in both years, nine showed decreases in 1960; New Jersey maintained the same enrollment; thirty-one states had increases. As with other enrollments reported in this junior-college survey, California led in per cents for Spanish for both years. In 1959, California's 7,577 students in Spanish represented 43.3 per cent of the total enrollment in modern foreign languages; in 1960, the 8,058 total was 40.4 per cent.

Table 7 summarizes "special languages" by states. The total enrollments in "special languages" in 1959 from four states was 309, and California had 231 or 74.8 per cent. In 1960, seven states reported a total of 563, with California's 376 representing 66.8 per cent of the total. "Special languages" had an increase of 254 or 82.2 per cent during the one-year time interval. There was a corresponding rise in per cents to the total enrollment in modern foreign languages, from .7 in 1959 to 1.1 in 1960.

Table 8 gives enrollments in "special languages" by language and by state. It shows that fourteen

different unusual languages were taught in 1959 and/or 1960. In 1959, California enrolled students in five "special languages" (Arabic, Armenian, Chinese, Hebrew, and Japanese); in 1960, California reported enrollments in the same five "special languages" and Portuguese. Hawaii with four special languages in 1960 (Chinese, Hawaiian, Japanese, and Samoan) was the only other state with more than one unusual language represented in any one year.

Table 9 summarizes entrance and graduation requirements. Foreign language credits were required for entrance into about ten per cent of the junior colleges in the fall of 1960. The great majority of these (82.2%) required two units. Slightly more than 12 per cent of the junior colleges reported foreign languages as graduation or terminal requirements. Of these colleges, 42.4 per cent required 12 semester hours; 35.6 per cent required from 4 to 7 semester hours.

Table 10 shows the number of teachers of modern foreign languages in junior colleges in 1960-61. There were a total of 463 full-time and 921 part-time teachers in the 474 junior colleges which reported modern foreign language enrollments. French led with 178 (38.4%) full-time and 345 (37.5%) part-time teachers, closely followed by Spanish with 170 (36.7%) full-time and 287 (31.2%) part-time. German had 81 (17.5%) full-time teachers and 205 (22.3%) part-time. Italian, Russian, and "others" had 7.3 per cent of the total full-time teachers and 9.1 per cent of those who taught part-time.

(Tables 1-10 are shown on following pages.)
